Journal of Graph Theory

Contents of Volume 37, 2001

Number 1, May 2001

Realizing Finite Edge-Transitive Orientable Maps
J. Širáň, T. W. Tucker, and M. E. Watkins 1

Menger's Theorem
T. Böhme, F. Göring, and J. Harant 35

Vertex-Disjoint Cycles of Length at Most Four Each of Which Contains a Specified Vertex
Y. Ishigami 37

Sharp Bounds for the Number of 3-Independent Partitions and the Chromaticity of Bipartite Graphs
F. M. Dong, K. M. Koh, K. L. Teo, C. H. C. Little, and M. D. Hendy 48

Information for Contributors I

Number 2, June 2001

When Bad Things Happen to Good Trees
M. Aivaliotis, G. Gordon, and W. Graveman 79

Chromatic Numbers of Quadrangulations on Closed Surfaces
D. Archdeacon, J. Hutchinson, A. Nakamoto, S. Negam, and K. Ota 100

Small Odd Cycles in 4-Chromatic Graphs
T. Jiang 115

A Family of Graphs and the Degree/Diameter Problem
G. Exoo 118

On Factors of 4-Connected Claw-Free Graphs
H. J. Broersma, M. Kriesell, and Z. Ryjáček 125

Information for Contributors I

Number 3, July 2001

Relative Length of Longest Paths and Cycles in 3-Connected Graphs
R. Li, A. Saito, and R. H. Schelp 137

Acyclic Edge Colorings of Graphs
N. Alon, B. Sudakov, and A. Zaks 157

On the Thomassen's Conjecture
J. LI 168

On Graphs Whose Line Graphs have Crossing Number One
S. Jendrol' and M. Klešč 181

Information for Contributors I

Number 4, August 2001

Spanning Trees with Many Leaves
G. Ding, T. Johnson, and P. Seymour 189

On Graphs with Small Ramsey Numbers
A. V. Kostochka and V. Rödl 198

Vertex Criticality for Upper Domination and Irredundance
P. J. P. Grobler and C. M. Mynhardt 205

Independent Perfect Domination Sets in Cayley Graphs
J. Lee 213

Almost All Graphs with High Girth and Suitable Density have High Chromatic Number
D. Osthus, H. J. Prömel, and A. Taraz 220

Another Two Graphs with No Planar Covers
P. Hliněný 227

A Graph with Cover Degeneracy Less than Chromatic Number
A. V. Pyatkin 243

Author Index 249
